VM® FOOTWEAR

ALWAYS A STEP AHEAD

YOUR PARTNER FOR SAFETY AND COMFORT SINCE 2003

More than just a footwear.

Your reliable companion in every step.

GORE-TEX PRODUCTS

BOA® DIALED IN. PRECISION FIT.

SOLES BY MICHELIN

TRADITION THAT PROTECTS. QUALITY YOU TRUST. YOUR PARTNER FOR SAFETY AND PERFORMANCE

Company **VM® Footwear** is a synonym for tradition, quality and trust that has been building for decades. We stand alongside professionals from various fields and sectors - from construction through industry to emergency response services - and we prove time and time again that our mission is not only a promise but a commitment: to protect those who work hard and to equip them with the best that modern technology offers. Behind every pair of shoes stands a team of experts that is constantly looking for new ways to improve your protection and comfort. We understand your work. We know that every day brings new challenges, that your feet not only carry the weight of your body but also bear responsibility for your safety, performance and duties. That is why we decided to go further than others. **We do not only bring you footwear - we bring you peace, assurance and the feeling you are equipped with the best there is.** Our strength lies in cooperation with legends. We are very proud to cooperate with leading global brands - **MICHELIN® Technical Soles, BOA® Fit System, GORE-TEX®:** and other innovators that define the future of safety and occupational footwear. These partnerships are no coincidence. We select the best because we know you deserve only top quality. Our many years of experience and our careful selection of partners enables us to offer you footwear that really works in any situation, in any weather, in any environment. We have combined the most modern technologies of global leaders with our deep knowledge of the needs of Czech and European professionals. **The result** is footwear that exceeds expectations and sets new standards - not only in safety and comfort but also in the trust that we are building with our partners every day. **Your safety is no coincidence. It is the result of experience, innovation and commitment to excellence.**

POWERED BY BOA® FIT SYSTEM CUSTOM FIT FOR PERFECT COMFORT

Forget outdated shoelaces and enter the new era of safety and occupational footwear with **BOA® Fit System** - technology that changes the rules of the game. **One quick rotation. One perfect fit. No compromises**. This breakthrough system replaces traditional shoelaces with a precise closure mechanism that allows you to adjust your shoes as needed in a matter of seconds. Thanks to advanced micro-regulation you can achieve perfect adjustment exactly to the shape of your foot - no pressure marks, no loosening, just pure comfort all day long. **The BOA® Fit System** is not just a technology. It is freedom of ovement, it is security and comfort that lasts all day. It is the feeling of your shoes working with you, not against you. **And we are proud to be able to bring this revolution to you, because you truly deserve the best.**

MICHELIN® TECHNICAL SOLES GRIP AND ENDURANCE INSPIRED BY A LEGEND

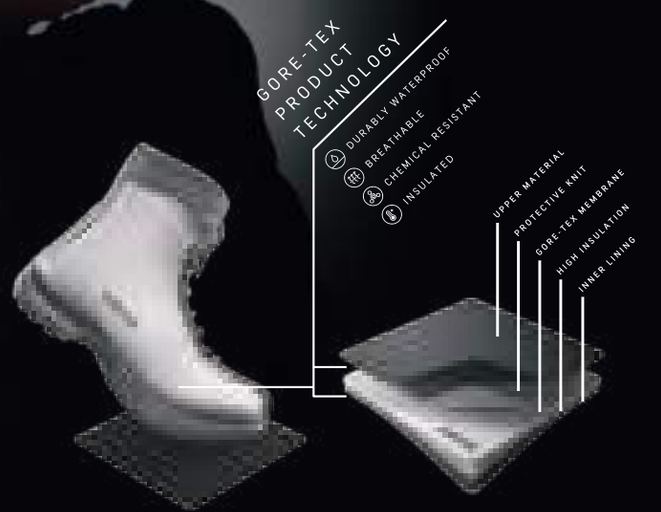

MICHELIN® tires are legendary thanks to their **safety, performance, and reliability.** And we're bringing those values to our footwear through **MICHELIN® soles.** A special rubber compound, well-structured tread and advanced construction - every detail is engineered to protect and secure no matter the challenge. From industrial floors through construction sites to rough outdoor terrain. The **MICHELIN® Technical Soles** represent the ideal combination of safety and performance for professionals that do not take chances. **When a legend becomes your foundation, every step is a step forward and brings confidence without fear. When it comes to yoursafety, a legend is the least you deserve.**

GORE-TEX® WATERPROOFNESS AND BREATHABILITY IN PERFECT HARMONY

Stay dry, comfortable, and at full performance - **with GORE-TEX®. The GORE-TEX® membrane is a world-renowned technology that has achieved the impossible - combining absolute waterproofness with perfect breathability.** This advanced membrane creates an invisible barrier that protects against water, snow and moisture, while the microscopic pores conduct sweat and excess heat away. **The result? Optimal microclimate inside the shoe no matter what is happening outside.** Footwear with **GORE-TEX® membrane** provides security and assures that your feet will remain in perfect condition throughout the day. No wet socks, no discomfort,no compromises. Just pure comfort and safety to boost your productivity and work satisfaction. **If your feet are fine, you are okay. That is exactly what GORE-TEX® provides - day by day, step by step.**

YOUR SAFETY - OUR COMMITMENT WHEN QUALITY IS NOT A COMPROMISE, BUT A STANDARD

Every step you take during the day, you are not only carrying your own weight but also responsibility, performance and commitment as well. Your work requires maximum concentration, precision and endurance - that is why you deserve footwear that will be your reliable partner on all these endeavors. **BOA® Fit System, MICHELIN® Technical Soles and GORE-TEX® - these are not just technologies. These are years of research, testing and innovation with one sole purpose: your safety, comfort and performance. Each of these technologies represents the pinnacle of its field and we are proud to call them our partner in the field of safety and comfort.**

SAFETY FOOTWEAR - NEWS AND CHANGES IN THE REVISED STANDARD **EN 20345:2022 ED.2**

Footwear of class I. (footwear made of leather and other materials, with the exception of all-rubber and all-polymer footwear):

- **SB** = S + basic requirements for execution and resistance of materials + slip resistance on ceramic floor tiles with NaLS
  - S: impact and compression resistant toe cap
- **S1** = SB + closed heel area + E + A
  - E: energy absorption of heel area
  - A: antistatic footwear
- **S2** = S1 + WPA
  - WPA: resistance of the upper against penetration and absorption of water
- **S3** = S2 + cleated outsole + P
  - P: Ø4,5mm protection of the bottom of the shoe against punctures (P)
- **NEW S3L** = S2 + cleated outsole + PL
  - PL: Ø4,5mm protection of the bottom of the shoe against punctures (PL)
- **NEW S3S** = S2 + cleated outsole + PS
  - PS: Ø3mm protection of the bottom of the shoe against punctures (PS)
- **NEW S6** = S2 + WR
  - WR: water resistance of the footwear
- **NEW S7** = S3 + WR
  - WR: water resistance of the footwear
- **NEW S7L** = S3L + WR
  - WR: water resistance of the footwear
- **NEW S7S** = S3S + WR
  - WR: water resistance of the footwear

Class II footwear. (all-polymer footwear (i.e. produced as a whole) including all-rubber (i.e. vulcanized as a whole)):

- **S4** = SB + closed heel area + E + A
  - E: energy absorption of heel area
  - A: antistatic footwear
- **S5** = S4 + cleated outsole + P
  - P: Ø4,5mm puncture protection of the bottom of the shoe (P)
- **NEW S5L** = S4 + cleated outsole + PL
  - PL: Ø4,5mm puncture protection of the bottom of the shoe (PL)
- **NEW S5S** = S4 + cleated outsole + PS
  - PS: Ø3mm puncture protection of the bottom of the shoe (PS)

IN ADDITION TO THE MANDATORY FOOTWEAR MARKING REQUIREMENTS, FOOTWEAR MAY HAVE OTHER ADDITIONAL REQUIREMENTS. FOR EXAMPLE, S1 FOOTWEAR CAN BE SUPPLEMENTED WITH P, PL OR PS PUNCTURE RESISTANCE AND OTHERS. POSSIBLE COMBINATIONS OF ADDITIONAL REQUIREMENTS CAN BE CHECKED IN THE TABLE ON PAGE 9.

NEW AND REVISED ADDITIONAL REQUIREMENTS OF EN 20345:2022 ED.2

- **NEW** – slip resistance on ceramic floor tiles with NaLS
- **NEW WPA** – resistance of the upper against penetration and absorption of water
- **NEW SC** – abrasion resistant scuff cap
- **NEW FO** – outsole resistance to fuel oil
- **NEW LG** – ladder grip
- **NEW AN** – ankle protection
- **NEW Ø** – not tested for slip resistance
- **NEW SR** – slip resistance on ceramic floor tiles with glycerine
- **NEW P** – Ø4,5mm puncture protection of the bottom of the shoe - metal inserts
- **NEW PL** – Ø4,5mm non-metallic insert resistant to puncture of a thorn with a diameter of 4.5 mm
- **NEW PS** – Ø3mm non-metallic insert resistant to puncture of a thorn with a diameter of 3.0 mm

MARKINGS THAT CAN NO LONGER BE FOUND IN THE REVISED VERSION OF THE STANDARD:

- **SRA** – slip resistance on ceramic floor tiles with SLS
- **SRB** – slip resistance on steel floors with glycerine
- **SRC** – slip resistance on ceramic floor tiles with SLS and steel floors with glycerin
- **WRU** – resistance of the upper against penetration and absorption of water
- **P** – puncture protection

CURRENT ADDITIONAL REQUIREMENTS OF EN 20345:2022 ED.2:

- **S** – impact and compression resistant toe cap; basic requirements for execution and resistance of materials
- closed heel area
- cleated outsole
- **C** – partially conductive footwear
- **A** – antistatic footwear
- **HI** – heat insulation of the bottom of the shoe
- **CI** – cold insulation of the bottom of the shoe
- **E** – energy absorption of heel area
- **WR** – water resistance of the footwear
- **M** – metatarsal protection
- **CR** – cut resistance (it is not a chainsaw cut protection)
- **HRO** – 300°C contact heat resistance of the outsole

OTHER

- resistance of the sole to electrocution. current up to 10 kV
- winter footwear
- chainsaw cut protection
- antistatic ESD properties

OCCUPATIONAL FOOTWEAR - NEWS AND CHANGES IN THE REVISED STANDARD EN 20347:2022 ED.2

Footwear of class I. (footwear made of leather and other materials, with the exception of all-rubber and all-polymer footwear):

- **OB** = BASIC REQUIREMENTS FOR EXECUTION AND RESISTANCE OF MATERIALS + SLIP RESISTANCE ON CERAMIC FLOOR TILES WITH NaLS
- **01** = OB + CLOSED HEEL AREA + E ENERGY ABSORPTION OF HEEL AREA + A ANTISTATIC FOOTWEAR
- **02** = 01 + WPA RESISTANCE OF THE UPPER AGAINST PENETRATION AND ABSORPTION OF WATER
- **03** = 02 + CLEATED OUTSOLE + P Ø4,5mm PUNCTURE PROTECTION OF THE BOTTOM OF THE SHOE (P)
- **NEW 03L** = 02 + CLEATED OUTSOLE + PL Ø4,5mm PUNCTURE PROTECTION OF THE BOTTOM OF THE SHOE (PL)
- **NEW 03S** = 02 + CLEATED OUTSOLE + PS Ø3mm PUNCTURE PROTECTION OF THE BOTTOM OF THE SHOE (PS)
- **NEW 06** = 02 + WR WATER RESISTANCE OF THE FOOTWEAR
- **NEW 07** = 03 + WR WATER RESISTANCE OF THE FOOTWEAR
- **NEW 07L** = 03L + WR WATER RESISTANCE OF THE FOOTWEAR
- **NEW 07S** = 03S + WR WATER RESISTANCE OF THE FOOTWEAR

Class II footwear. (all-polymer footwear (i.e. produced as a whole) including all-rubber (i.e. vulcanized as a whole)):

- **04** = OB + CLOSED HEEL AREA + E ENERGY ABSORPTION OF HEEL AREA + A ANTISTATIC FOOTWEAR
- **05** = 04 + CLEATED OUTSOLE + P Ø4,5mm PUNCTURE PROTECTION OF THE BOTTOM OF THE SHOE (P)
- **NEW 05L** = 04 + CLEATED OUTSOLE + PL Ø4,5mm PUNCTURE PROTECTION OF THE BOTTOM OF THE SHOE (PL)
- **NEW 05S** = 04 + CLEATED OUTSOLE + PS Ø3mm PUNCTURE PROTECTION OF THE BOTTOM OF THE SHOE (PS)

IN ADDITION TO THE MANDATORY FOOTWEAR MARKING REQUIREMENTS, FOOTWEAR MAY HAVE OTHER ADDITIONAL REQUIREMENTS. FOR EXAMPLE, 01 FOOTWEAR CAN BE SUPPLEMENTED WITH P, PL OR PS PUNCTURE RESISTANCE AND OTHERS. POSSIBLE COMBINATIONS OF ADDITIONAL REQUIREMENTS CAN BE CHECKED IN THE TABLE ON PAGE 9.

NEW AND REVISED ADDITIONAL REQUIREMENTS OF EN 20347:2022 ED.2

- NEW — SLIP RESISTANCE ON CERAMIC FLOOR TILES WITH NaLS
- NEW WPA — RESISTANCE OF THE UPPER TO WATER PENETRATION AND ABSORPTION
- NEW SC — ABRASION RESISTANT SCUFF CAP
- NEW FO — OUTSOLE RESISTANCE TO FUEL OIL
- NEW LG — LADDER GRIP
- NEW AN — ANKLE PROTECTION
- NEW Ø — NOT TESTED FOR SLIP RESISTANCE
- NEW SR — SLIP RESISTANCE ON CERAMIC FLOOR TILES WITH GLYCERINE
- NEW P Ø4,5mm — PUNCTURE PROTECTION OF THE BOTTOM OF THE SHOE - METAL INSERTS
- NEW PL Ø4,5mm — NON-METALLIC INSERT RESISTANT TO PUNCTURE OF A THORN WITH A DIAMETER OF 4.5 MM
- NEW PS Ø3mm — NON-METALLIC INSERT RESISTANT TO PUNCTURE OF A THORN WITH A DIAMETER OF 3.0 MM

MARKINGS THAT CAN NO LONGER BE FOUND IN THE REVISED VERSION OF THE STANDARD:

- SRA — SLIP RESISTANCE ON CERAMIC FLOOR TILES WITH SLS
- SRB — SLIP RESISTANCE ON STEEL FLOORS WITH GLYCERINE
- SRC — SLIP RESISTANCE ON CERAMIC FLOOR TILES WITH SLS AND STEEL FLOORS WITH GLYCERIN
- WRU — RESISTANCE OF THE UPPER AGAINST PENETRATION AND ABSORPTION OF WATER
- P — PUNCTURE PROTECTION

CURRENT ADDITIONAL REQUIREMENTS OF EN 20347:2022 ED.2:

- BASIC REQUIREMENTS FOR EXECUTION AND RESISTANCE OF MATERIALS
- CLOSED HEEL AREA
- CLEATED OUTSOLE
- C — PARTIALLY CONDUCTIVE FOOTWEAR
- A — ANTISTATIC FOOTWEAR
- HI — HEAT INSULATION OF THE BOTTOM OF THE SHOE
- CI — COLD INSULATION OF THE BOTTOM OF THE SHOE
- E — ENERGY ABSORPTION OF HEEL AREA
- WR — WATER RESISTANCE OF THE FOOTWEAR
- M — METATARSAL PROTECTION
- CR — CUT RESISTANCE (IT IS NOT A CHAINSAW CUT PROTECTION)
- HRO 300°C — CONTACT HEAT RESISTANCE OF THE OUTSOLE

OTHER

- RESISTANCE OF THE SOLE TO ELECTROCUTION. CURRENT UP TO 10 KV
- WINTER FOOTWEAR
- CHAINSAW CUT PROTECTION
- ANTISTATIC ESD PROPERTIES

MICROFIBER

MICROFIBER
Upper HIGH-TECH material composed of microfibers, reaching the appearance, breathability, water resistance and parameters of the natural leather. Shoes can be washed at 40°C.

SPACE comfort

SPACE COMFORT
The optimal width of shoes guarantees the necessary comfort

HARDHEEL STRUCTURED

HARDHEEL STRUCTURED
Modern solutions of the heel shoe part, which ensures maximal stabilization of the foot while walking and standing.

FORCED CIRCULATION

FORCED CIRCULATION
Exhaust ventilation system combined with lining with absorbent capability. These shoes are "breathing" and provide maximum comfort.

ANATOMIC AIR COMFORT

ANATOMIC AIR COMFORT
Special insole with gel insert in the heel shock absorbing (absorbs energy) while walking - bamboo fiber ensures extraction of water vapor and optimal climate inside the shoe.

SOLES BY MICHELIN

MICHELIN® TECHNICAL SOLES
The outsoles are equipped with a combination of specially designed rubber compounds and are inspired by unique technical design of world famous brands Michelin® tires.

VM® | SYSTEMS

METATARSAL
Special protection system of the metatarsus, suitable for foundries, ironworks, etc.

POWERED BY BOA® FIT SYSTEM
Patented BOA® Fit System is reinventing the way how we tie our shoes. The BOA® Fit System combines a steel wire, nylon guides and a mechanical dial for tension adjustment to combat the long list of deficiencies found in traditional closures.

ANTI-CUT
Special inner lining, 100% KEVLAR in total weight of 650g/m^2. With several layers it provides resistance against chainsaw.

GORE-TEX® MEMBRANE
Highly durable, breathable, waterproof and windproof fabric. Together with the insole and the leather upper of the shoe, they form the perfect solution for an optimal climate inside the shoe. Provides thermal insulation, vapor permeability and water resistance.

ANATOMIC DRY SOLE
Anatomic, comfortable and shaped insole with excellent water absorption and are quick drying.

NON METALLIC
Shoes without any metal components suitable for areas that require it.

WHEN IT COMES TO PERFORMANCE, THERE IS NO COMPROMISE - category **Fire & Fight** represents modern, stylishly designed footwear for the most demanding conditions. Our footwear is intended for professionals – firefighters, intervention units, the police, the army, as well as special forces, but can be appreciated by all those who are seeking maximum safety, resistance and comfort during outdoor activities, hiking or airsoft. In this category, you can find high-end models with **waterproof lining**, **MICHELIN® soles** and the unique closure system **powered by BOA® Fit System** for perfect and quick adjustment around your foot and reliability at all times. **Fire & Fight** is synonymous with confidence, innovation and protection - our footwear stands firm where all else fails. **Choose footwear that will never let you down - no matter if you are on field duty or conquering your own challenges.**

SOLES BY MICHELIN

MICHELIN® TECHNICAL SOLES
The outsoles are equipped with a combination of specially designed rubber compounds and are inspired by the unique technical design of the world-famous **Michelin** tires

FORCED CIRCULATION
Optimized air circulation inside the shoe for maximum comfort

BOA® DIALED IN PRECISION FIT.

powered by BOA FIT® SYSTEM
Unique closure system

anatomic DRY SOLE

ANATOMIC DRY SOLE
Anatomically shaped quick-drying insoles with excellent absorption capacity

WATERPROOF LINING
Vapor-permeable, water-resistant lining

SPACE comfort

SPACE COMFORT
Optimized ergonomics and shoe width

SECURITY AND SAFETY IN EVERY STEP – the footwear in the category **Strong & Safety** represents the perfect solution for everyone who needs safety, comfort and reliability when working in moderately difficult environments. **It is the perfect choice for industry, logistics, transport, trade, outdoor plants or warehouses.** Selected models in this collection are equipped with the **unrivalled GORE-TEX® membrane** for maximum protection against moisture, **with MICHELIN® soles** to protect every step and with the unique closure system **powered by BOA® Fit System** for quick and exact tightening. The resistant upper made of **polyamide fabric PUTEK** pushes the boundaries of strength and durability. **Choose the footwear that will not let you down – strong, safe and ready for any challenge!**

VM FOOTWEAR
ALWAYS A STEP AHEAD

MEMBRANE GORE-TEX®
Vapor-permeable, waterproof GORE-TEX® membrane

WATERPROOF LINING
Vapor-permeable, water-resistant lining

powered by BOA FIT® SYSTEM
Unique closure system

SOLES BY MICHELIN

MICHELIN® TECHNICAL SOLES
The outsoles are equipped with a combination of specially designed rubber compounds and are inspired by the unique technical design of the world-famous **Michelin** tires

HARD HEEL STRUCTURED
Modern solutions of the heel shoe part, which ensures maximal stabilization of the foot while walking and standing

SPACE COMFORT
Optimized ergonomics and shoe width

ANATOMIC DRY SOLE
Anatomically shaped quick-drying insoles with excellent absorption capacity

HRO
The outsoles resistant to fuel oils and contact heat HRO up to 300 °C

ABRASION-RESISTANT PUTEK FABRIC
High-strength polyamide fabric PUTEK.

FORCED CIRCULATION
Optimized air circulation inside the shoe for maximum comfort

NON METALIC
Shoes without any metal components suitable for area that require it

RELIABILITY AND COMFORT IN EVERY DETAIL - the footwear in the category **Work & Tight** is made for your everyday comfort and safety in light environments, dry indoor spaces, **ESD environments** or assembly halls. It combines an ultra-light construction (**ULTRALIGHT Series**) and high **ESD properties** with maximum comfort - **HI-POLY** insoles cushion every step. Selected models will excite you with the **unparalleled GORE-TEX® membrane** for humidity resistance, unique closure system **powered by BOA® Fit System** for perfect tightening in a matter of seconds, as well as the uncompromising grip of the **MICHELIN® soles**. The **PUTEK** polyamide fabric uppers ensure high strength and extreme durability. **Discover the combination of peak technologies and maximum functionality!**

VM FOOTWEAR
ALWAYS A STEP AHEAD

WORK & TIGHT

SOLES BY MICHELIN

SOLES BY MICHELIN®
The outsoles are equipped with a combination of specially designed rubber compounds and are inspired by unique technical design of world famous brands Michelin® tires.

PUTEK

ABRASION-RESISTANT PUTEK FABRIC
High-strength polyamide fabric PUTEK.

NON METALIC

NON METALIC
Shoes without any metal components suitable for area that require it.

FORCED CIRCULATION

FORCED CIRCULATION
Exhaust ventilation system combined with lining with absorbent capability. These shoes are "breathing" and provide maximum comfort.

SPACE comfort

SPACE COMFORT
Optimized ergonomics and shoe width.

BOA® DIALED IN. PRECISION FIT.

BOA FIT® SYSTEM
Unique system of closing shoes.

GORE-TEX PRODUCTS

MEMBRANE GORE-TEX®
Vapor-permeable, waterproof GORE-TEX® membrane

anatomic DRY SOLE

ANATOMIC DRY SOLE
Anatomically shaped insole with excellent absorbency and dryness.

MICROFIBRE

MICROFIBRE
Upper HIGH-TECH material composed of microfibers, reaching the appearance, breathability, water resistance and parameters of the natural leather.

ESD

ESD
Antistatic ESD properties

OCCUPATIONAL AND SAFETY ANKLE SHOES - MICROFIBER
GORE-TEX® MEMBRANE, POWERED BY BOA® FIT SYSTEM

PRECISION AND LIGHTNESS FOR CLEAN ENVIRONMENTS - Enter the world where technology meets maximum comfort. Fit & Go is a category designed for professionals who work in controlled and clean environments, where every detail matters. If you work in dry indoor environments, cleanrooms, **ESD** zones, assembly halls or the technical sector – this collection is the perfect choice for you. The vast majority of this category consists of **ESD** footwear with antistatic properties that ensure safe electrostatic discharge dissipation and protect sensitive components as well as you, but it also includes footwear for hygienically demanding workplaces where cleanliness and professional appearance play the key role. **Fit & Go** combines lightweight construction with advanced technologies - selected models are equipped with the revolutionary closure powered by **BOA® Fit System**, which enables lightning-fast tightening with millimetre accuracy. **Choose the footwear that keeps up with your precision.**

VM® FOOTWEAR
ALWAYS A STEP AHEAD

FIT&GO

BOA FIT® SYSTEM
Unique system of closing shoes.

FORCED CIRCULATION
Exhaust ventilation system combined with lining with absorbent capability. These shoes are "breathing" and provide maximum comfort.

NON METALIC
Shoes without any metal components suitable for area that require it.

ANATOMIC DRY SOLE
Anatomically shaped insole with excellent absorbency and dryness.

ESD
Antistatic ESD properties

SPACE COMFORT
Optimized ergonomics and shoe width.

MICROFIBRE
Upper HIGH-TECH material composed of microfibers, reaching the appearance, breathability, water resistance and parameters of the natural leather.

ABRASION-RESISTANT PUTEK FABRIC
High-strength polyamide fabric PUTEK.

SAFETY LOW SHOES ESD

WHERE WORK MEETS LEISURE - **Discover the category that changes the rules of the game. Job & Walk** introduces high-end footwear for those in search of the perfect balance between professional performance and the comfort of everyday use. Whether you are a long-distance driver, a manager constantly on the move, a logistics operator or you are just enjoying your free time and outdoor activities - this collection is tailored to your needs. This category includes fully certified occupational, safety and managerial footwear in timeless sporty and outdoor design that looks good at work as well as after work. Selected models are equipped with the **unbeatable GORE-TEX® membrane** for maximum protection against adverse weather conditions, the **legendary MICHELIN® soles** ensuring outstanding adhesion and endurance, or the revolutionary **closure system BOA® Fit System** for precise adjustment.

SOLES BY MICHELIN

MICHELIN® TECHNICAL SOLES
The outsoles are equipped with a combination of specially designed rubber compounds and are inspired by the unique technical design of the world-famous **Michelin** tires

GLOBAL RECYCLING STANDARD
Standard recycled fibers

powered by BOA FIT® SYSTEM
Unique closure system

SPACE COMFORT
Optimized ergonomics and shoe width

FORCED CIRCULATION
Optimized air circulation inside the shoe for maximum comfort

ANATOMIC AIR COMFORT
Special insole with shock absorbing gel heel insert and high energy return and bamboo fiber that prevents accumulation of water vapour and ensures optimal climate inside the shoe

ANATOMIC DRY SOLE
Anatomically shaped quick-drying insoles with excellent absorption capacity

MEMBRANE GORE-TEX®
Vapor-permeable, waterproof GORE-TEX® membrane

ABRASION-RESISTANT PUTEK FABRIC
High-strength polyamide fabric PUTEK.

MICROFIBER
High-technology upper material composed of poromeric microfibre exceeding various parameters of natural leather such as appearance, breathability, water resistance etc.

WATERPROOF LINING
Vapor-permeable, water-resistant lining

SOFTSHELL
Functional textile upper with excellent water resistance

Trail & Trek

DESIGNED FOR ADVENTURERS - Trail & Trek is a category made for all those who love spending time outdoors and are in search of footwear that can keep up with their adventurous spirit. No matter whether you prefer **jogging, advanced trekking, light outdoor activities or just active leisure time**, this collection is your reliable companion on every journey. Footwear in the category **Trail & Trek** combines lightweight construction with advanced technologies for maximum performance and comfort. Selected models are equipped with a **SOFTSHELL upper** that provides excellent protection against wind and moisture while maintaining breathability, as well as **waterproof lining** that can keep you dry even in the most demanding conditions. **Get ready for any trip - easy trails or mountain hiking - Trail & Trek will not let you down.**

SOLES BY MICHELIN

SOLES BY MICHELIN®
The outsoles are equipped with a combination of spaecially designed rubber compounds and are inspired by unique technical design of world famous brands Michelin® tires.

FORCED CIRCULATION
Exhaust ventilation system combined with lining with absorbent capability. These shoes are "breathing" and provide maximum comfort.

SPACE COMFORT
Optimized ergonomics and shoe width.

WATERPROOF LINING
Vapor-permeable, water-resistant lining

ANATOMIC DRY SOLE
Anatomically shaped insole with excellent absorbency and dryness.

ANATOMIC AIR COMFORT
Special insole with gel insert in the heel shock absorbing (absorbs energy) while walking - bamboo fiber ensures extraction of water vapor and optimal climate inside the shoe.

SOFTSHELL
Textile functional material, ensuring water resistance

Leisure & Pleasure

FREEDOM IN EVERY STEP - Leisure & Pleasure is made for those who enjoy their free time to the fullest and are looking for footwear that is a reliable partner for every activity. Whether you are resting after a day of driving, you are a manager relaxing after a stressful day, a logistics operator or an outdoor enthusiast- this collection offers the perfect combination of style and functionality. Here you can find lightweight sandals, as well as versatile footwear designed with advanced materials that ensure maximum comfort, breathability and longevity. Selected models are equipped with the **legendary MICHELIN® soles** for outstanding grip on any surface, whereas others incorporate a waterproof lining that protects from an unexpected downpour. **Leisure & Pleasure is more than just footwear – it is your key to freedom, relaxation and adventure. Footwear that will not disappoint you, no matter where you are going.**

SOLES BY MICHELIN

SOLES BY MICHELIN®
The outsoles are equipped with a combination of specially designed rubber compounds and are inspired by unique technical design of world famous brands Michelin® tires.

WATERPROOF LINING
Vapor-permeable, water-resistant lining

SPACE COMFORT
Optimized ergonomics and shoe width.

ANATOMIC DRY SOLE
Anatomically shaped quick-drying insoles with excellent absorption capacity

MICROFIBER
High-technology upper material composed of poromeric microfibre exceeding various parameters of natural leather such as appearance, breathability, water resistance etc.

FORCED CIRCULATION
Exhaust ventilation system combined with lining with absorbent capability. These shoes are "breathing" and provide maximum comfort.

ANATOMIC AIR COMFORT
Special insole with shock absorbing gel heel insert and high energy return and bamboo fiber that prevents accumulation of water vapour and ensures optimal climate inside the shoe
